

Dear Sirs,

As a Amateur Radio operator I have been licensed since 1978 and have enjoyed my hobby very much, BUT after hearing some of the interference being caused by BPL at some of the test areas I am very much opposed to allowing it to continue to expand. I have over head power lines within 50 feet of my antenna. If this is allowed to happen then my happy days of Amateur Radio will cease. Thank you for considering my point of view and NOT going along with the wishes of the power companys in their present interfering form.

Thank You, Donald Parker, WD4OEV
